

What if I had never picked up that first cigarette?
One decision changed my entire life.

You don't think anything is going to happen.
2 masses in my neck, 2 masses in my left shoulder,
spots all the way down my spine, my hips, my lungs.

I was diagnosed with stage 4 lung cancer.

Am I going to see my little boy grow up? If something happens
to me, is my wife taken care of?

I knew I should have quit. I just never quit.

In memory of Justin Scott Andrews
1980-2010
