

SURVEILLANCE UPDATE

North Carolina Tobacco Prevention and Control Branch -- June 2012

2011 N.C. Youth Tobacco Survey: Lifetime Smoking

Percentage of N.C. middle and high school students who report lifetime smoking, by gender: N.C. YTS, 2011

Percentage of N.C. middle and high school students who report lifetime smoking, by grade level: N.C. YTS, 2011

Percentage of N.C. middle and high school students who report lifetime smoking, by race/ethnicity: N.C. YTS, 2011

Percentage of N.C. middle and high school students who report lifetime tobacco use, by tobacco product: N.C. YTS, 2011

Weighted to provide estimates representative of the public middle & high school student population; Persons reported ever smoking a cigarette in their lifetime. Specific data on 95% confidence intervals and regional definitions is at the N.C. YTS website.

*Use caution when interpreting. Results based on small sample size.

The N.C. Youth Tobacco Survey (N.C. YTS) provides a critical source of public health data for understanding the scope of the tobacco problem and measuring progress toward overall goals among youth. N.C. 2011 YTS is a comprehensive statewide representative sample of more than 10,000 middle and high school students. Every other year a core set of CDC tobacco-related questions are asked. In addition, states add questions related to local program factors. The sampling scheme is now intended to generate significant numbers for regional data (West, Central and East). Caution should be used in interpreting results when only a small number of respondents have answered the question. See the N.C. Tobacco Prevention and Control Branch website for more information.
